

## Endpoint Security

- ✓ FULL DISK ENCRYPTION
- ✓ ANTIVIRUS
- ✓ PATCH MANAGEMENT (Largest Patch Catalog)
- ✓ DEVICE AND PORT CONTROL
- ✓ APPLICATION WHITELISTING
- ✓ WAKE-ON-LAN – Patch offline Machines
- ✓ CONTENT WIZARD – Automate manual work
- ✓ REAL-TIME REPORTING – Single Dashboard

## Endpoint Manager:

- ✓ Patch management
- ✓ Vulnerability dashboards/reports
- ✓ Preventive measures – app control
- ✓ Response and remediation

## Patch Manager – Windows / Linux, UNIX, MAC

### Shavlik – SCCM 3<sup>rd</sup> party Extension

- ✓ Native plug-in for sccm
- ✓ Extensive third-party software catalog
- ✓ Customized patches
- ✓ Simplified reporting

## Application Control for Endpoints

- ✓ Manage user and Application privileges (server and Desktop)
- ✓ Server Access Control
- ✓ License Management
- ✓ Know what you are running
- ✓ Who is using what and how
- ✓ Stop unauthorized Applications
- ✓ Track all changes related to application and user compliance

## Device Control – Security for ATM, Point of Sale, etc'

- ✓ Data copy restrictions
- ✓ Application whitelisting
- ✓ Context-based permissions for plug and play devices
- ✓ Temporary access – timeframe

### DISCOVERY AND INVENTORY

You can't secure the devices and assets you don't know about.

### PATCH AND VULNERABILITY MANAGEMENT

Keep operating system and third-party application patches up to date.

### APPLICATION CONTROL

Allow only known, authorized apps to run.

### PRIVILEGE MANAGEMENT

Balance user access with productivity needs.

### REMIEDIATION OF RUNNING RANSOMWARE

Kill it remotely and don't let it spread with ransomware protection.

### COMPLIANCE YOU CAN PROVE

Understand at a glance the threat posture of your organization.

# Strengthen security with multiple layers of defense

## IT Asset Management Suite

- ✓ Asset visibility – discovery and inventory
- ✓ Software license tracking
- ✓ Lifecycle management – manage asset from hire to retire
- ✓ Automated workflows

## Asset Manager for Endpoints

## License Optimizer for Clients

- ✓ Powerful license engine
- ✓ Software license monitoring
- ✓ “what if” modeling and analysis (.e.g cloud migration)
- ✓ Valuable reclamation

## License Optimizer for Servers

- ✓ Agentless discovery
- ✓ CMDB Support
- ✓ Microsoft, oracle, and IBM discovery
- ✓ Global software library

### ASSET DETECTION

Discover and inventory new purchases along with owned hardware and software so you know what you have and where it is—from acquisition to disposal.

### BOOST PRODUCTIVITY

Supply end users the right tools at the right time, reduce systems downtime, and schedule hardware refreshes to budget appropriately.

### REDUCE MAINTENANCE COSTS

Easily discover what hardware must be purchased, updated, and maintained in order to keep costs down and your assets in good health.

### MAXIMIZE ASSET USE

Gain insight about what assets are available and on hand to ensure it's not sat on the shelf.

### AUTOMATED PROCESSES

Having a clear and actionable path for events like onboarding and offboarding ensures your assets and employees are their most productive.

### FLEXIBLE ASSET MANAGEMENT

Better information means you can make better decisions on-the-go. Import and track warranty, lease, and contractual information automatically.

## IT asset management for the future of your business

Your old way of inventorying assets is both time consuming and chaotic. Updating a spreadsheet with the details of every piece of hardware and software your organization owns can be a full-time job. Yet it doesn't deliver the needed visibility to forecast when to update, repair, or buy new assets to ensure IT can keep pace with the growing, changing demands of the business. When you have a solution that handles everything you need to control your assets from purchase to disposal, you avoid feelings of helplessness and lagging behind.

# Ivanti IT Service Management

On Premise or in the Cloud

## Service Manager

- ✓ Drag & drop workflow – it service automation
- ✓ Multi-channel self service
- ✓ Voice automation
- ✓ Cloud or on premise

### STREAMLINE PROCESSES

Incorporate best practice processes, workflows, and actions for more efficient and effective delivery.

## Help Desk/Service Desk

- ✓ Proactive management - identify potential problems
- ✓ Achieve SLA & compliance goals - automated monitoring processes
- ✓ Consistent change management processes

### IT SELF SERVICE

Provide an experience like no other for users to search and request approved services that they are entitled to.

## Service Management (3)

- ✓ Pinkverify ITIL certification – 13 ITIL processes
- ✓ Achieve SLA & compliance goals - automated monitoring processes
- ✓ event management
- ✓ financial management – IT charge back
- ✓ portfolio & project management
- ✓ release management

### INTEGRATE SYSTEMS AND DATA

Integrate with IT systems and data to get the visibility and tools needed to deliver services on time.

## ITSM Integration

- ✓ Code free
- ✓ Pre-built connectors
- ✓ More self service

### WORKFLOW AUTOMATION

Employ automation across processes and systems and see how much faster you'll be able to deliver services.

### REDUCE REPETITIVE TASKS

Eliminate annoying, repetitive tasks (like resetting passwords) and free up your team to focus on more important projects.

### TRACK PROGRESS

Track ITSM performance for continuous service improvement and plan for future resources.

## Service delivery as it was meant to be

You need simple IT service management solutions to help meet your service delivery needs. So you want to add self service for you users? Automate repetitive tasks and adopt consistent processes that show the most appropriate actions to take? Add dashboard reporting to gain more insights? Ivanti combines these capabilities to improve service delivery from day one.

## Endpoint Manager (formerly LDMS)

- ✓ Endpoint management - discover, inventory, and configure all devices—pcs, laptops, servers, tablets, and smartphones.
- ✓ OS provisioning - simplify imaging
- ✓ Software distribution including app store
- ✓ Pc and mac remote control

## DesktopNow

- ✓ Migrate profile data between OS
- ✓ Stop malware and ransomware
- ✓ Secure file sync and access

## Environment Manager

Environment Manager decouples user settings and manages them separately from the desktop, allowing portability across devices.

The result? Fast logons and personalized workspaces that users love, with less work for you.

## File Director

- ✓ Control where data is stored.
- ✓ Granular file-access policy.
- ✓ Windows, Mac, iOS, Android, Web.
- ✓ OneDrive for Business support.

## Performance Manager

- ✓ Improve server's usage and user Performance
- ✓ Reduce Power consumption

## Desktop and Server Management

- ✓ Multi-platform endpoint management
- ✓ Software packaging and deployment
- ✓ Imaging / os deployment
- ✓ Patch management
- ✓ Remote control
- ✓ User profile migration
- ✓ Configuration management
- ✓ Prepackaged configuration templates for firewalls, security settings, service configurations, local password changes and more.
- ✓ Citrix / server management

### SIMPLIFY YOUR IMAGES

Everything is extrapolated from the OS, so there's no need for so many images. The solution lays everything back down automatically.

### TIME-SAVING TEMPLATES

Provision new or existing devices using templates that minimize configuration steps. Have users up and running with fewer incidents.

### USER PROFILES AND PERSONALIZATION

Keep the user experience consistent. Extract and move user profiles, settings, and files between Windows versions fluidly.

### MAINTAIN SECURITY STANDARDS

Migrate devices to the latest Windows versions without un-encrypting them. Gain privilege management controls upon update.

### IMPROVE ONGOING PROVISIONING PROCESSES

Use the migration to upgrade your processes—improve your provisioning, patching, and software license compliance processes.

### DELIVER NEW MACHINES WITH ZERO-TOUCH

Create a system for applying your image and user profiles to devices that come directly from resellers.

## Employ proven desktop migration solutions

Migrating Windows operating systems isn't only about solving a single problem. We can help you make permanent improvements to your Windows management and updating approach. Solutions from Ivanti enable you to automate the *entire* migration and provisioning process. Remember the school system mentioned earlier? The system's IT department can easily image hundreds of devices a day—more than 2,000 machines a week. Instead of installing and configuring applications, IT ensures there are no business interruptions while users move to an even more efficient OS.
